

PHOTONIS is a multinational high-technology group, with more than 40 years of experience in manufacture, sales and innovation, specializing in photo sensor technology. The Group operates internationally in the markets of Night Vision, Digital Vision and Scientific Detectors. PHOTONIS is developing at a fast pace and will become an even more significant multinational technology based company to provide our customers with increasing levels products, quality and service.

To strengthen our Business Unit Scientific Detectors Sales, PHOTONIS Netherlands B.V. is offering an:

INTERNSHIP 6 SIGMA WITHIN SCIENTIFIC DETECTORS (M/F)

The Business Unit Scientific Detectors wants to improve their global processes which keeps PHOTONIS in a market leadership position.

The Job

As an intern you will research the customer demand vs added value delivered by PHOTONIS from a customer's perspective. Define (real) customer needs, Identify CTQ's, Define "need to have and nice to have's" and non-added value services within our current processes.

Furthermore you will come with an improvement plan to improve our customer service and reduce our costs.

We offer

A full time internship in a booming high-tech company for a period of 6 months

Requirements

You are in your 2nd, 3rd or 4th year of your bachelor Business Administration (or comparable). You have a hands-on mentality, can work independently and are a team player.

This position is also open for master students.

You are creative in your research; problem solving is your second nature just as thinking outside the box. Organising and planning comes natural with you.

CV and cover letter in English to be sent to HRM, PHOTONIS: hrm@nl.photonis.com
