

## Spanish special forces choose Photonis

**Mérignac, France - January 17th 2023**

Photonis, the world leader company regarding night vision products, is very proud to announce that the Special Forces of the Spanish Army have decided to buy night vision binoculars using Photonis 4G intensifier tubes.

### Contract details

The Spanish Army has concluded a contract worth several million euros with the company NVLS (Night Vision Lasers Spain) for the delivery of 450 night vision binoculars. The delivery of the products was made at the end of 2022.

### The trust of the Spanish army in the French company

Through this agreement, the Spanish army thus confirms its trust. Indeed, it had already bought Photonis intensifier tubes through a multi-year contract signed in 2019 for AN/PVS14 type monoculars.

These massive and successive orders support the reputation of excellence of Photonis 4G tubes regarding night vision. The many features of Photonis products have managed to convince the vast majority of European armies these past years: lightness of equipment, longevity of tubes, ability to see farther in increasingly low levels of darkness, ultra fast auto-gating function preventing blinding...

"We are very happy that the Spanish army has once again chosen Photonis. We are confident that more European soldiers will be able to carry out their night missions with the best equipment available on the market." said Jérôme Cerisier, CEO of Photonis, following the announcement of the contract.
