

The IP-67 certified enclosure.

SCIENTIFIC THERMAL INFRARED CAMERA.

The M200hd is a cooled, high-performance scientific thermal infrared camera designed to provide excellent image quality and impressive thermal sensitivity. It features our unique real-time calibration and is an excellent choice for a variety of scientific and industrial applications.

KEY BENEFITS

HIGH FRAME RATE

Maximum data throughput is larger than 1 Gigapixel/s. High performance electronics produce thermal images at rates up to 180 fps in full-frame mode. Sub-windows can be acquired at rates up to 2180 fps.

HIGH-SPEED INTERNAL MEMORY

1 GB memory for autonomous operation.

HIGH SENSITIVITY

Temperature differences as small as 30 mK are detectable.

ADVANCED CALIBRATION

Unique proprietary real-time processing of infrared images including NUC, radiometric temperature, automated exposure control (AEC) and enhanced high-dynamic-range imaging (EHDRI).

With these unique features, scientists benefit from ease of use and operation flexibility while getting accurate measurements over the entire camera's operation range.
